

EXPRESS SOLUTION

Electric Utility

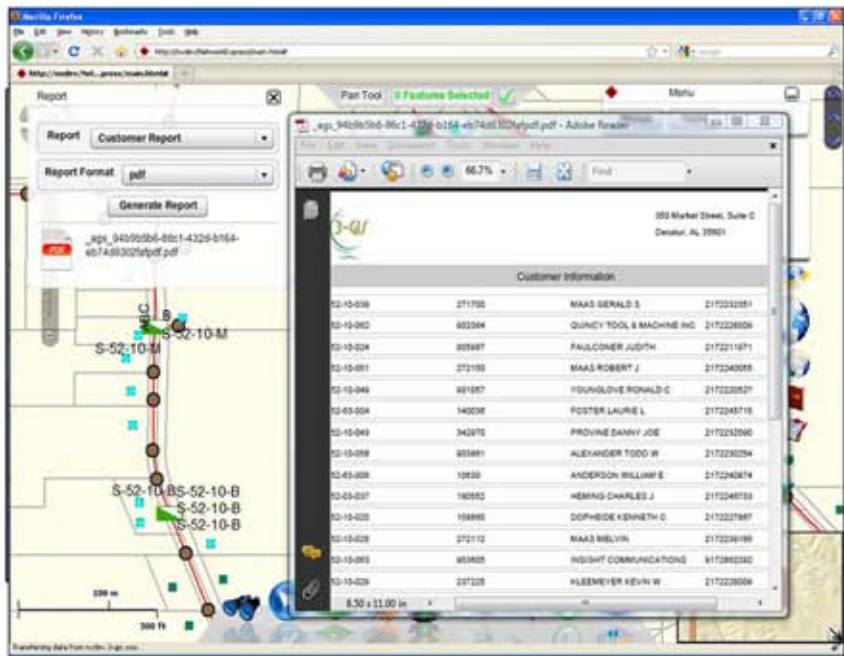

3-GIS recognizes the problems faced by GIS professions in the electric utility industry today. From investor owned utilities to rural cooperatives, companies in the electric market must cope with complex GIS technology that is difficult to learn, expensive licensing costs and multiple workflows for different user groups. The 3-GIS Express Solution has been developed to assist electric utilities address these issues and more.

3-GIS Express Solution

NETWORK EXPRESS GIS Editing and Design on the Web

Network Express provides a modern user interface that is easy to use and interpret. Void of cumbersome menus, drop-downs and commands, Network Express allows the desktop user to quickly and efficiently perform tasks.

Meeting the needs of the desktop user:

- Editing – With Precision Placements
- Tracing - Outage and Phase
- Plotting
- Flexible Query Tool
- Configurable Reporting
- Address Location, Routing
- Work Order Management

Network Express has a report engine that can be easily configured. This report shows customers affected by a potential outage.

FIELD EXPRESS CHAMELEON Mobile Asset Management

Field Express Chameleon for Electric Utilities:

- Structure Inspections
- ROW Inspections
