

EXPRESS SOLUTION

Emergency Management

3-GIS offers the emergency management, public safety and Homeland Security markets solutions which streamline processes allowing operating centers and first responders the ability to better prepare for and respond to disaster scenarios and daily operations. In conjunction with our business partners in this arena, 3-GIS prides itself in offering the most advanced GIS technology in the market.

3-GIS Express Solution

NETWORK EXPRESS
The base for Mapper 2.0

Built using the ESRI Flex API, Network Express provides a modern user interface that is easy to use and interpret. Network Express provides the building blocks for the ESi online product WebEOC Mapper Professional 2.0. With Mapper 2.0, an emergency operations center can gain real time access to the common operating picture.

Network Express as Mapper 2.0:

- Beyond Easy; Intuitively Simple
- More than 100 Customers
- Auto-Geoprocessing
- Mashup Automation (WMS, GeorSS, Tiled & Dynamic Layers)
- Integrates into Operational Systems (EOC, NOC, Field House)
- Plume Modeling & Road Management

FIELD EXPRESS CHAMELEON Mobile Access to your Assets

By using the mobile technology of 3-GIS, first responders can easily automate and encourage incident data collection, reporting and sharing. With the ability to post detailed information back in real time, first responders can give the EOC an up-to-date snap shot of the common operating picture.

Rapidly Configured to Perform:

- Infrastructure reporting
- Incident reporting
- Natural disaster reporting

The Field Express disaster management bundle allows users to take pictures with their handheld device.
