

EXPRESS SOLUTION

3-GIS understands that municipalities must meet the needs of several departments and consumers within their community. The 3-GIS Express Solution provides municipalities with GIS applications that can be easily rolled out across these various departments. By providing a system that is pervasive across the entire municipality, 3-GIS alleviates the need for multiple systems thus reducing installation and maintenance costs.

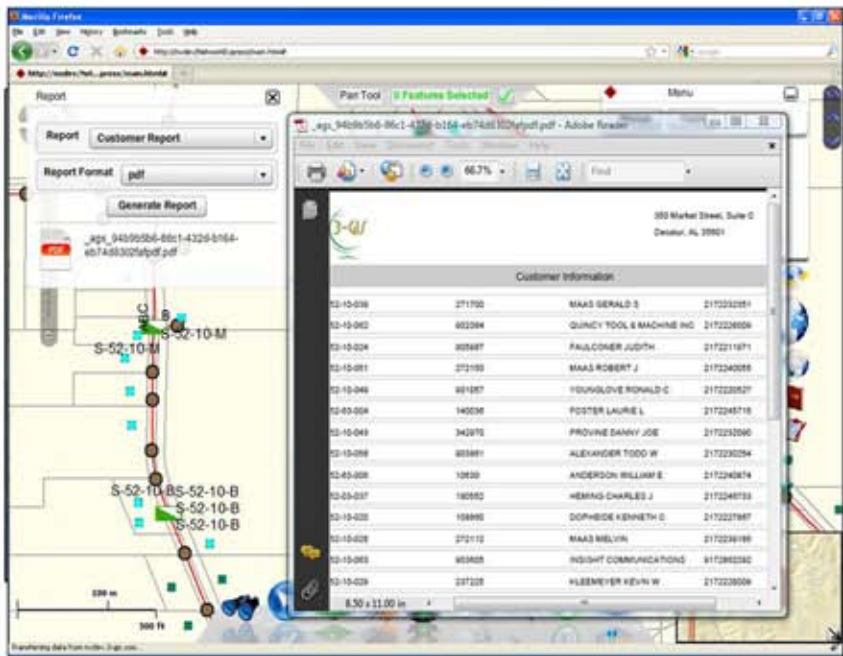

3-GIS Express Solution

NETWORK EXPRESS

GIS Editing and Design on the Web

Network Express provides a modern user interface that is easy to use and interpret. Void of cumbersome menus, drop-downs and commands, Network Express allows the desktop user to quickly and efficiently perform tasks.

Meeting the needs of the desktop user:

- Editing – Placement, Deletes, Edits
- Related Records – Full editing & viewing
- Tracing - Outage, Phase, Isolation
- Plotting
- Flexible Query Tool
- Configurable Reporting
- Address Location, Routing
- Work Order Management

Network Express has a report engine that can be easily configured. This report shows customers affected by a potential outage.
