

Full autonomy

Ready-set usability

System flexibility

Control your user experience with full system configuration

3-GIS | Admin gives you the power to fully configure how users interact with the entire 3-GIS software suite—anywhere and at any time. Tailor the UI to provide users with only the tools they need for the job, and easily modify processes per project.

What you can do with 3-GIS | Admin

With no custom coding required, 3-GIS | Admin grants you the freedom to create a system of regulations and guidelines to define how the software is accessed and operated by users of all levels, from employees to third party vendors.

- > Create protection rules based on user roles to restrict data access
- > Help maintain overall data integrity by enforcing data verification
- > Update material lists and costs on the fly to keep reports accurate

About 3-GIS | Admin

3-GIS | Admin is a browser-based portal used by system administrators to configure map services and modules, system preferences, and user accessibility for 3-GIS | Web, 3-GIS | Mobile, 3-GIS | Prospector, and 3-GIS | Network Express.

Key features

- > Assign and define user roles
- > Limit tool access and visibility
- > Control data access by third-parties
- > See overall system health
- > Define administrator privileges
- > Maintain material catalog
- > Define BOM and QAQC rules
- > Define work packet exports
- > Enforce data validation rules
- > Control attribution visibility and editability
- > Create and configure reports

Service security and compliance

In order to support requirements for security groups (virtual firewall) advanced encryption, subnets, IAM, VPC (including ingress and egress controls), 3-GIS Live is hosted by Amazon Web Services (AWS). AWS is aligned and compliant with applicable regulations and standards including ISO/IEC 27001/2. We utilize relevant standards as we configure our solutions in the AWS cloud infrastructure. AWS offers secure solutions for highly sensitive data such as government agencies and departments as well as private firms.

About us

3-GIS, an SSP Innovations company, empowers companies to achieve better operating efficiencies and to meet the challenges of building increasingly complex fiber networks. 3-GIS uses a data driven approach based on geospatial reference, rules-based calculations, mobility, and web-based services to revolutionize the potential and realize the market opportunities of fiber assets. Our fully-configurable solutions allow users to plan, design, and manage networks; provide real-time data that is used enterprise-wide; and enable automation for faster service activation, in one seamless system. The company has development, design services, product support, and operational staff in five countries challenging the status quo every day to improve the economic visibility of fiber networks; creating a more connected, informed, and lighted world.
